

Sea Technology Index, Volume 14, 1973

This is a three-part, instant-reference index of technical material and news appearing in Volume 14, 1973. Part 1, Monthly Contents; Part 2, Authors; Part 3, Subject Index. Numbers following title, author or subject are month and page numbers.

PART 1 — MONTHLY CONTENTS

JANUARY 1973

A Matter Of Perspective (editorial)	7
Soundings	9
New Nuclear Package Analyzes Mineral Deposits On Sea Floor	10
Offshore Trends	15
Oil Industry Urges More Offshore Leases	21
Ship Launchings Highlight Active Year In Ocean Mining	21
Milestones Accomplished In Oil Pollution Control	22
U.S. Shipbuilding At Highest Rate Since World War II	23
IDOE Starts Major Ocean Research Projects Interest High In Desalting Processes Using Low Energy	25
Developing Nations Oppose Powers On Law-of-the-Sea	25
Sea Grant Programs Face Consolidation & Retrenching	27
Navy Continues Priority On Ocean Surveillance Systems	27
International & Domestic Issues Face U.S. Fisheries	29
AOO — The Ocean Communicator	33
Opinion Poll	33
Capital Report	38
Navy Currents	39
International	41
Product Development	45
Marketing & Business	47
SUBIGLOO Rated A Success	48
Contracts	49

FEBRUARY 1973

Full Sovereignty Versus Resource Control (editorial)	5
Soundings	7
Capital Report	8
Navy Currents	11
Improving The Capability To Cleanup Oil Spills In U.S. Waters	14
X-Rays Check Welds On Navy's Deep Diving System	17
Building A Successful Ocean Business The Hard Way	18
1973 Oil Spill Conference Program	20
Product Development	23
Offshore Trends	26
Research	27
Marketing & Business	28
NPC Energy Report Urges Development Of Domestic Resources	29
International	31
People	32
Contracts	33

MARCH 1973

Opening the Satellite Treasure Chest (editorial)	9
Soundings	11
Offshore Trends	13
Offshore Technology Conference, Houston Development Of Electronic Technology For Deep Ocean Applications	24
Automating NOAA's Hydrographic Survey And Data Processing System	27
Priorities Shifted In FY-1974 Federal Marine Science Programs	36
Capital Report	36
Navy Currents	37
Research	39
Product Development	41
Marketing & Business	45
People	46
Contracts	47

APRIL 1973

Regulation, Yes; Monopoly, No (editorial)	9
Soundings	11
Offshore Trends	12
Sophisticated Instrumentation — Man's Extension Into The Sea	18
Free Diving Buoy Measures Ambient Ocean Acoustics	21
Ocean Engineering's 1000-ft. Saturation Diving Complex	23
Acoustic Transducer Operates For Years At 2,258-Ft. Depth	24
International	25
Capital Report	26
Navy Currents	27
Research	29
Opinion Poll Results	30
Opinion Poll Questionnaire	32
Product Development	33
Marketing & Business	37
People	38
Contracts	41

MAY 1973

Russia Moves Into A Vacuum (editorial)	9
Soundings	11

Underwater Photography Aids Marine Science Teaching	12
Offshore Trends	14
The Oceans and National Economic Development	17
Deep Ocean Photography	20
A Large Array Simulator For Testing Sonar Systems	24
Undersea Surveillance Continues To Have High Budget Priority	27
Marine Weather Forecasting	29
Capital Report	31
Navy Currents	33
Product Development	35
Elimination of ASW Threat Against SSBN Forces Is In Best Interests of Nuclear Strategic Stability (letters)	39
Marketing & Business	41
People	42
Contracts	43

JUNE 1973

Selling Sea Grant (editorial)	7
Soundings	9
Offshore Trends	10
Review Of Current Meter Technology	16
The Sea Use Council	19
Surface Exhaust System For Scuba Regulators	21
Alcoa Seaprobe Extends Deepsea Search And Recovery Capabilities	22
A New Lightweight Buoy	25
Capital Report	27
Navy Currents	29
Research	29
Product Development	33
Marketing & Business	34
People	35
Contracts	35

JULY 1973

Sadness And A Plea (editorial)	9
Soundings	13
What's In A Name?	15
Tragedy In The Johnson-Sea-Link	17
Offshore Engineering	20
Marine Electronics	23
Ocean Research	23
A New Spectrum Analyzer For Marine Applications	27
Influence Of Cavitation Erosion On Adhesive Strength Of Elastomeric Coatings	30
New Plants In Operation At ITT Cable-Hydraspace	33
9th Annual MTS Conference & Exposition	36
Marine Pollution	43
Ships And Structures	44
Navy Currents	46
International	48
Letters	49
Capital Report	51
Opinion Poll Results	53
Product Development	55
People	58
Contracts & Orders	59

AUGUST 1973

A Second Decade Of Ocean Rhetoric? (editorial)	7
Soundings	9
Marine Electronics	10
Offshore Engineering	12
Ocean Research	14
Hughes Deep Ocean Mining Vessel Delivered By Sunship	17
Hydrographic Computer Centers Go To Sea	18
50-Ft. Reinforced Epoxy Vehicle Carries Acoustic Test Equipment	23
The Superport Situation	24
Navy Currents	26
Marine Pollution	28
Ships And Structures	29
Capital Report	29
Product Development	31
People	34
Contracts And Orders	35

SEPTEMBER 1973

Work In The Sea — The Mix Jells (editorial)	9
Soundings	11
The Beaver Goes To Work	12
Marine Electronics	14
Offshore Engineering	15
Ocean Research	16
Hotline — A Communications System For Diving Research	18
Naval Research Laboratory Celebrates 50th Year	23
Scientists In-The-Sea Program Graduates Third Diving Class	25
Ships And Structures	26
Marine Pollution	27
Capital Report	29
Navy Currents	29
Company Notes	31

A New Fast Fourier Transform Analyzer	32
Product Development	35
International	37
People	38
Contracts And Orders	39

OCTOBER 1973

MTS — Missed Opportunities (editorial)	7
Soundings	9
Offshore Engineering	10
Marine Electronics	11
Ocean Research	11
Design and Construction of Cables For Sensor Systems	14
Sonar Re-Entry System Positions BOP Stack At 800-Ft. Depth	17
New Satellite Navigation Positioning System	19
Marine Technology Society Honors & Awards	21
Ships And Structures	23
Marine Pollution	24
Navy Currents	25
Capital Report	26
Company Notes	28
International	29
Product Development	31
People	34
Contracts And Orders	35

NOVEMBER 1973

For The ASW Surface Navy: Rebirth (editorial)	9
Soundings	11
Offshore Engineering	12
Marine Electronics	14
Ocean Research	17
Ships And Structures	17
ASW — Challenges And Bold Solutions	24
Design and Construction Of Cables For Sensor Systems — Part II	29
A Laboratory For Evaluation Of Underwater Surveillance Systems	38
Marine Pollution	38
Capital Report	39
Navy Currents	39
Turner Distressed Ship Location System	41
Matorala Introduces New Horizontal Positioning System	43
Letters	44
Product Development	45
Company Notes	48
International	49
People	50
Contracts & Orders	51

DECEMBER 1973

Energy In The Oceans (editorial)	7
Soundings	9
Offshore Engineering	10
Marine Electronics	10
Ocean Research	12
National Ocean Industries Association Shows Rapid Expansion	17
Neutrino Detection In An Undersea Habitat	18
46 Divers Participate In Ten PRINUL Missions	20
Manpower For Offshore Technology	22
Ships And Structures	24
Marine Pollution	25
Navy Currents	27
Capital Report	28
Product Development	29

UNDERWATER MISSILE PROPULSION

Edited by Leonard Greiner

Don't pass up this opportunity to get your copy of the first comprehensive technical book on unmanned underwater missiles and propulsion systems.

Covers basics of propulsion systems, electrical engines, heat engines, instrumentation and testing facilities. Contains detailed technical data and design fundamentals never before published in the underwater field.

300 illustrations, 512 pages, 31 chapters, hardbound. Thousands sold at \$16.00, get yours for only \$8.00. Act now on this special offer. Valid only with prepayment. Send check or money order to:

Dillon load cell system measures tension and controls forces.

Dillon stainless steel load cells provide remote measurement of tension, torque or compression . . . hundreds of feet away, or only inches. As many as 6 cells may be summed — or any selected combination. Ideal for remote monitoring in out-of-the-way or dangerous installations. A portable, universal unit for use in shop, field and lab. 36 capacities from 0-10 lbs. up to 0-500,000 lbs. Accuracy within $\pm 1/4\%$ of full scale. Direct indication in lbs. on digital or meter readouts, recorders or printers. Automatic adjustable limit controls optional.

FREE! LOAD CELL SYSTEM CATALOG 24-page manual shows typical uses in various industries. Dozens of valuable ideas for solving weighing and force measurement problems. Write today!

32 Sea Technology / December 1973

**At last!
A family of
true marine
transducers
for pressure,
temperature, flow, liquid level**

The ever-increasing sophistication of marine instrumentation systems requires transducers of greater accuracy and reliability than can be provided by adapting an industrial transducer to a shipboard application.

That's why Consolidated Controls has developed an entirely new line of marine transducers from scratch. Housed in rugged, gasket-sealed cast aluminum housings, these units are of all-welded construction and are completely manufactured from corrosion-resistant materials specifically selected for sea water applications.

Consider, for example, the Type 41GP50 pressure transducer illustrated. It's available for gage, absolute or differential pressure measurements in ranges from 15 psi to 6000 psi. There is a choice of output voltage ranges — 4 to 20 ma., 10 to 50 ma., 0 to 5 v. or 0 to 10 v., all DC — for two- or four-wire systems.

Get the full story on CCC marine transducers by calling Joe DeLeonardis at (203) 743-6721 or writing
